

1. Copy the “evivetest.py” file to your desktop.
2. Open the “Terminal” application:

3. Type the following command: `cd ~/Desktop`

```
Desktop — -bash — 80x24
joes-mbp:~ joedalen$ cd ~/Desktop
joes-mbp:Desktop joedalen$
```

4. Run the program with the following command: `python evivetest.py`

```
Python projects — Python evivetest.py — 80x24
joes-mbp:Python projects joedalen$ python evivetest.py
Querying Movies: 1 out of 52 pages
```

Note: while the program is running it will show you progress of its completion. Once finished you will see the results:

```
joes-mbp:Python projects joedalen$ python evivetest.py
40 Actors/Actresses appeared in at least 1 tv-show/movie in December of 2017!
Would you like to see the output? Y/N:
```

You will then be prompted to view the result in JSON format, if you'd like to view the output just type “y” and hit enter or if you do not want to view the result type “n” and hit enter.
